NORDIC

– Nordic beauty for all times

Nordic offers a similarly simple design as COM 1000 and is the essence of a timeless carpet with high quality as the key factor. The classic expression sparks associations to cobblestone paving, a classic architectural element in the urban space.

With its Nordic simplicity, based on proud weaving traditions, this carpet is a beautiful choice at all times and for any type of commercial project. Like most Fletco carpets, Nordic is woven of white, undyed yarn and dyed after weaving, which offers a high degree of flexibility for specific commissions, a wider colour range and the possibility of custom colours.

Available as broadloom, square carpet tiles, ZigZag-Tiles® or LockTiles® – our patented concept that allows for a perfect installation with minimally visible joints and a homogeneous expression.

Available from our warehouse in 18 carefully curated colours. Custom colours available from 200+ m2. Felt backing from +200 m2.
