

am-clad

antimicrobial wall cladding

OUR PREMIUM RANGE OF PVC WALL CLADDING AND PROTECTION

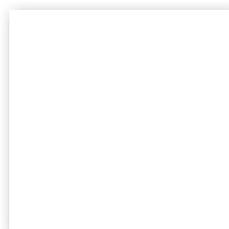

Our range of high-grade PVC systems offer you a choice of colours, finishes and performance levels to meet all of your specifications.

AM-Clad antimicrobial and hygienic sheets and accessories are proven in a wide range of sectors, including operating rooms, food, drink and tech manufacturing facilities, schools, retail (front and back of house), laboratories and pharmaceutical plants. Our materials are installed by our network of approved Principal Installers to ensure a quality finish on every project.

The AM-Clad team have decades of experience within the PVC Cladding industry and are well versed in all aspects of cladding a hygienic environment. We will offer you expert advice on the ideal cladding solution for your next hygienic upgrade installations.

SPECIFICATIONS

SHEET DETAILS

2.5mm AM-Clad PVC Wall Cladding

2440mm (8') x 1220mm (4')

3050mm (10') x 1220mm (4')

Finish: **Satin or gloss**

Weight: **3.5 kg per m²**

Service temp: **-10°C to +60°C**

Preparing the surface

AM-Clad products should be fitted to a plumb surface that is clean, dry, smooth and free from dust, grease and flaking paint. It can be fitted over existing tiles, fair-faced brickwork, blockwork, plaster walls and boarded-out stud partitions. The sheets fix directly to the dry substrate using high quality AM-Clad trade adhesives. See the AM-Clad Installation Guide for full details.

Cutting and Drilling

Sheets can be cut to size using a fine-toothed, circular or jig saw and specialist hand tools. Use slow machine/drill speeds to prevent overheating.

METHOD OF FIXING

Systems and sheets should be bonded to the wall with AM-Clad trade adhesive.

Joints

Sheets are fixed using matching PVC 'H-Divider' joints and end trims, flush hot welded joints, or matching foodsafe silicone sealant. Always leave an expansion gap of 3mm to 4mm at all joints/fixings – see current Datasheet and Fixing Detail PDFs for guidance.

Corners

Sheets can be expertly thermoformed on-site ensuring a professional finish and minimising edge joints around corners, windows and doors.

Floor junction

Specialist PVC profiles create a neat interface between AM-Clad sheets and floor detail, or a vinyl overlay, as required.

Chemical Resistance

High resistance to mineral acids, alkalis, plating solutions, paper making chemicals, pickling solutions, inorganic solutions and fumes. See individual Datasheets for more details.

Fire Ratings

AM-Clad products have been independently tested to the following classifications.

Cleaning

Regular cleaning using a soft cloth and a suitably diluted mild detergent is all that is normally required. Do not use abrasive pads or wire wool. Do not clean above 60°C.

Warranty

AM-Clad systems are guaranteed for 30 years. Full Warranty details are available on request.

Storage

Sheets should be stored away from direct sunlight at a temperature within a 13°C to 40°C range.

Limitations

AM-Clad sheets should not be used in rooms where the temperature exceeds 60°C or near a naked flame.

Our Premium Decorative Printed Hygienic PVC Wall Cladding System

AM-Clad Vision offers you unlimited scope in personalising large and small areas with high-resolution decorative hygienic PVC wall cladding panels.

We offer a selection of attractive designs including tile, brick, wood, marble and fabric, and the option to use your own high-resolution photographs and graphics to create unique designs for your building or department.

The AM-Clad Vision system combines premium grade solid PVC with advanced high-resolution print technology and a hard-wearing protective coating that is proven in commercial environments.

Ideal for both dry and wet areas, creating colourful feature walls in entrance, reception and waiting areas in medical, corporate or retail settings. Also suitable for shower rooms, changing rooms, WCs, wet rooms, spas and indoor pool surrounds.

Technical Details

Sheet Details

2.5mm AM-Clad Vision PVC Cladding:

2438mm (8') x 1220mm (4') x 2.5mm

2744mm (9') x 1220mm (4') x 2.5mm

3048mm (10') x 1220mm (4') x 2.5mm

Finish: Smooth Satin

Coating: Durable Hygienic & Foodsafe

Weight: 3.5 kg per m²

Service temp: -10°C to +60°C

Surface Preparation

Sheets should be fitted to a plumb surface and can be fitted over existing tiles, brickwork, blockwork, plaster walls and boarded-out stud partitions. The sheets fix directly to the dry substrate using AM-Clad adhesives.

Cutting and Drilling

Panels can be cut to size using an appropriate saw. See the current AM-Clad Installation Guide for full details. The protective film should be left in place. Use slow drill speeds to penetrate the panel and leave a 3mm to 4mm expansion gap around pipes etc.

Joints

Sheets are fixed using printed PVC 'H-Divider' joints and end trims which match the panel designs. See the current AM-Clad Installation Guide for full instructions.

Corners

Sheets can be expertly thermoformed on-site ensuring a professional finish and minimising edge joints around corners, windows and doors. Thermoforming requires temperatures between 130°C and 170°C.

Chemical Resistance

High resistance to mineral acids, alkalis, plating solutions, paper making chemicals, pickling solutions, inorganic solutions and fumes. Good resistance to alcohols, aliphatic hydrocarbons, glycols, amines, phenols. Not recommended for contact with ketones, chlorinated solvents, aromatic hydrocarbons, some esters and ethers.

Temperature

AM-Clad Vision sheets have a maximum working temperature of 60°C. We do not recommend AM-Clad Vision for commercial kitchens or places where higher temperatures are generated by appliances or machinery.

Flammability

AM-Clad Vision is self-extinguishing and complies with the most demanding international fire resistance standards defined for plastics, as shown below.

Standard:

EN 13501
DIN 4102
BS 476/7
NSP 92501,5
ASTM E 8 4

Classification:

B, s3, d0
B1
Class 0
M1
Class A

THE AM-CLAD2.5MM ANTIMICROBIAL CLADDING SYSTEM

AM-Clad 2.5mm Antimicrobial Cladding System is the ideal cladding solution for hygiene-critical areas in pharmaceuticals, biotech and medical facilities.

The antimicrobial properties are added during manufacturing. Tiny particles of silver ions deliver an authentic sterile performance. The active ingredients contain no toxins and prevent the growth of viruses and bacteria such as COVID- 19, E.Coli, Influenza and MRSA.

PRODUCT DESCRIPTION

Extruded rigid antimicrobial PVCu sheet

Performance:	Proven to kill bacteria and inhibits growth of pathogens
Colour :	AM-Clad is available in a wide range of subtle and vibrant colours which can be seen in our brochures
Surface finish:	Smooth, satin finish

Measurements

2.5mm AM-Clad sheets are available in three sizes:

4ft x 8ft x 2.5mm, 22lbs/panel

4ft x 9ft x 2.5mm, 24.75lbs/panel

4ft x 10ft x 2.5mm, 27.5lbs/panel

Weight: 3.5 kg per m²
(8' panel 22lbs, 9' panel 24.75lbs,
(10' panel 27.5lbs)

Service temp: -10°C (4°F) to +60°C (140°F)

Flammability

AM-Clad Antimicrobial is self-extinguishing and complies with the most demanding international fire resistance standards defined for plastics, as shown below:

Standard:	Classification:
EN 13501	B, s3, d0
DIN 4102	B-1
BS 476/7	Class 0
NSP 92501,5	M-1
ASTM E 84	Class A

Chemical Resistance

High resistance to mineral acids, alkalis, plating solutions, paper making chemicals, pickling solutions, inorganic solutions and fumes. Good resistance to alcohols, aliphatic hydrocarbons, glycols, amines, phenols.

Temperature

AM-Clad Antimicrobial sheet has an operating temperature range of -10°C (4°F) to +60°C (140°F).

AM-CLAD COMES WITH A LIFETIME GUARANTEE

Surface Preparation

Sheets should be fitted to a plumb surface and can be fitted over existing tiles, brickwork, blockwork, plaster walls and boarded-out stud partitions. The sheets fix directly to the dry substrate using professional adhesives.

Joints

Sheets are fixed using hot welded joints. This involves leaving an even 3mm to 4mm gap between the vertical edges of the sheets when bonding them to the wall. The gap is then filled and hygienically sealed with hot weldrod.

Cutting and Drilling

Panels can be cut to size using an appropriate saw. See the current AM-Clad Installation Guide for full details. The protective film should be left in place. Use slow drill speeds to penetrate the panel and leave a 3mm to 4mm expansion gap around pipes etc.

Corners

AM-Clad Antimicrobial sheets can be expertly thermoformed on-site ensuring a professional finish and minimizing edge joints around corners, windows and doors. External corners in high traffic areas can also be over-clad with robust corner protectors. Thermoforming requires temperatures between 130°C (266°F) and 170°C (338°F).

Cleaning

AM-Clad Antimicrobial is resistant to a range of cleaning chemicals used within typical pharmaceutical and cleanroom environments. A full chemical resistance data sheet is available on request. For regular cleaning use a soft cloth and suitable detergent. Do not use abrasive pads or wire wool. Do not clean above 60°C (140°F).

Proven Antimicrobial Performance

AM-Clad Antimicrobial wall cladding has a smooth, satin surface. The antimicrobial properties are added during manufacturing and its active ingredients contain no toxins and prevent the growth of bacteria, mold and viruses such as COVID-19, E.Coli, Influenza and MRSA.

AM-Clad's biocidal performance was measured in an independent test and the results are recorded and illustrated in the chart below. It is highly effective against the top ten most common pathogens or 'superbugs' and its resistance to chemicals ensures no reduction in performance over time.
