

Fletco Carpets
- walk on visions

This imaginative carpet tile concept gives the client freedom to design a unique flooring solution to match the individual project perfectly, creating interesting effects within the specific context of the space and other interiors in the building.

Art Weave is an innovative collection of flat woven carpet tiles that expresses something living and organic in an artistic and graphic way. Each expression comes in different colours – in four different shapes. The expressions, colours and shapes makes it easy to create a living and unique flooring solution.

ART WEAVE - the concept

Art Weave is created from a vision of bringing art literally down at floor level. A desire to create a different life on the floor. The design of Art Weave is inspired by the unique structures in different materials, which are interwoven into a living, organic, and graphic direction.

Designs

1 The artistic expression comes automatically when selecting Art Weave tiles. Select 1 of the 4 designs. Select the design which fits to your project.

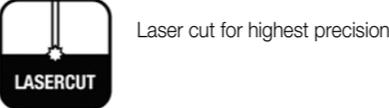

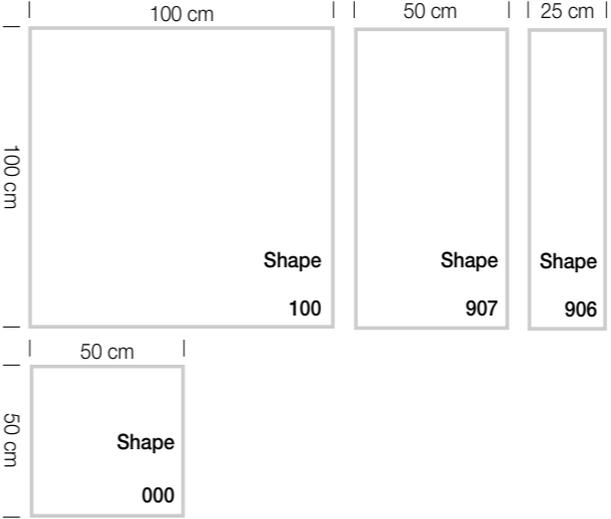

Colours

2 Whether you stick to one colour or play with different colours, you can create unique flooring solutions in all environments.

Shapes

3 Art Weave is made in 4 different shapes, which are laser cut out of a large master tile. Select shape(s).

Installation

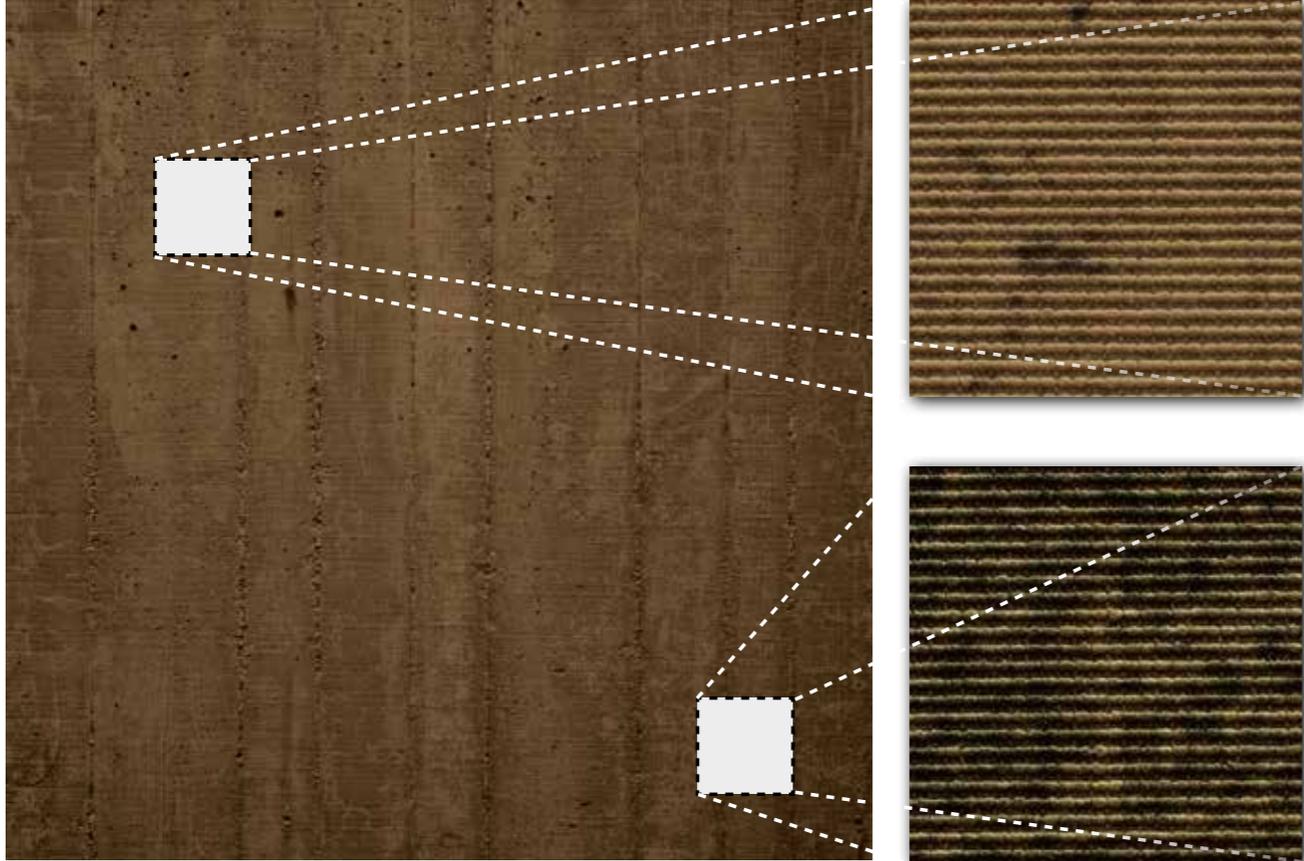

4 To ensure a living, graphical and almost collage-like effect the pieces are not numbered. It is part of the design that the tiles are laid randomly.

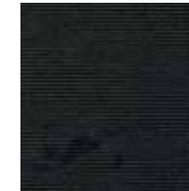

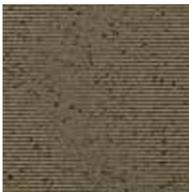

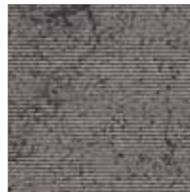

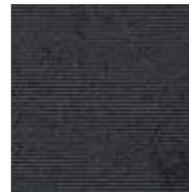

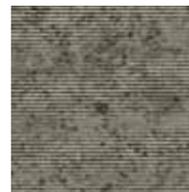

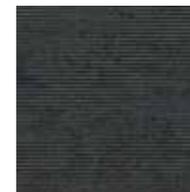

ART WEAVE - from master tile to tile

Depending on the selected designs the master tile has areas that are darker and lighter than other areas and the pattern is more distinct in one area than another. When the tiles are laser cut out of the master tile, some tiles will therefore be darker, some lighter and some with more pattern than others. This means that each tile is unique and since the tiles are not numbered and should be laid randomly, you will always get an artistic and unique expression with Art Weave tiles.

See the figure below.

ART WEAVE - colours and designs

Erosion					
	T800 001 Colour 250	T800 001 Colour 300	T800 001 Colour 320		
Broad Lines					
	T800 009 Colour 150	T800 009 Colour 170	T800 009 Colour 300	T800 009 Colour 350	T800 009 Colour 450
Micro					
	T800 006 Colour 200	T800 006 Colour 300	T800 006 Colour 380		
Stone					
	T800 002 Colour 150	T800 002 Colour 250	T800 002 Colour 300	T800 002 Colour 320	

Colours are representative and may vary from the actual product. Please note that the above shown designs are random sections, which have been laser cut from a master tile.

Sustainable Innovation

Fletco Carpets focuses on environmental impacts in all our manufacturing processes, from cradle to grave. Sustainability is key to all our product development. We use 100% wind energy in our entire production - including Art Weave by Fletco.

One particular environmental challenge that applies to carpet tiles generally is the backing, which traditionally contained PVC and/or bitumen. Thanks to new production technology, the backing of all Fletco carpet tiles is guaranteed free of these and other harmful chemical substances.

- Backing made of 100% recycled PET material, equivalent to min. 50 x 0,5L PET bottles per m².
- Low VOC emissions.
- No bitumen, PVC, latex or other harmful substances.
- Permanently antistatic
- Noise attenuating
- Produced using 100% renewable energy (wind energy)
- Odourless – latex-free pre-glued
- Fletco Carpets TEXTiles® are GUI approved "allergy-friendly"

Interior Design and Acoustics

Noise reduction is an important factor in interior design in both office buildings and in the hospitality sector. Designing a space is all about creating an esthetic room and a peaceful indoor environment.

A serious approach to acoustics is of great importance for the staffs' well-being and workplace satisfaction. It is a proven fact that poor acoustics lead to higher disturbance and have a direct impact on employees' concentration and performance.

Fletco manufactures high-end design carpet tiles that allow you to make a statement; you can choose either a classic or an abstract design to influence the atmosphere of a room. Moreover, Fletco contributes to reduce stress and frustration in office and institutions – and when it comes to hospitality and entertainment, carpets help to control sounds reverberation, minimize echoes and reduce floor impacts. Textile floor coverings in broadloom and in tiles are the main tools to soften unwanted noise – and carpets from Fletco will help you to design spaces that also sustains high foot traffic use.

Fletco Carpets is a modern company, based in Denmark, that has a proud tradition of manufacturing industrial textile products to high-quality craftsmanship standards. Product development, flexibility and efficient and eco-friendly production are keys to the entire company.

For several years now, Fletco has spearheaded a green agenda, taking environmental issues into account at all stages of production, including research into the use of eco-friendly materials.

Fletco addresses both the contract and residential market and is one of Europe's leading wovencarpet brands.
