

A modern office interior featuring a dark blue and grey checkered carpet. In the foreground, a black metal chair with a black seat is positioned on the carpet. To the right, a desk with a black frame and a glass top holds a bright orange ergonomic office chair. A large, black, cone-shaped pendant light hangs above the desk. In the background, another desk with an orange chair is visible, along with large windows offering a view of a city skyline. The ceiling has exposed concrete beams and a white acoustic panel.

# CLASSIC COLLECTION BY FLETCO

# ABOUT FLETCO CARPETS

## **Quality, craftsmanship and innovation**

Since 1947, proud craft traditions combined with a passion for innovation and a sustainable approach have been at the heart of Fletco's production of high-quality carpets. Founded as a family-owned business, Fletco is mindful of the company's proud heritage and guided by the values that have driven development since day one: precision, quality, innovation and care for the environment at every stage of the process. We always strive to be at the forefront of technological advances and new environmental standards.

## **Danish production and in-house test lab ensure long durability**

Today, Fletco Carpets is a specialist in flat-woven carpets and one of Europe's leading suppliers to the international contract market. The company is also both an OEM (Original Equipment Manufacturer) and White Label manufacturer of carpets for many high-end design brands around the world. In addition to weaving and tufting, our production facilities also include dyeing, backing and an in-house test lab. Our top priority is to see quality materialized in every single carpet. Backings made of eco-friendly felt, textile or foam along with unsurpassed stability and first-rate wearability are key elements in ensuring the long durability of a Fletco carpet.

## **Weaving craft with a human touch**

We are proud of our modern, advanced production equipment, with looms and tufting machines that have been continually developed to produce carpets in the most rational and efficient way. The same is true of the other high-efficiency machines we use to produce the carpets. However, even the most technically advanced looms require skilled human operators who master their craft to perfection. Keen eyes monitoring the machines, deft hands threading them manually – and rethreading them if the strand breaks – and, not least, experienced and creative master weavers who create Fletco's timeless yet distinctive carpet design based on carefully selected materials, functional priorities and the full potential of the loom.

## **From yarn to carpet in subtle colourways**

Creating world-class carpets requires top-quality raw materials. That is why most of our carpets are made from our own proprietary yarns made from white filaments or fibres that are intermingled and twisted. We do this to ensure the high level of quality and subtle colourways that have become hallmarks of Fletco carpets. To avoid waste, meet individual customer demands and ensure fast delivery, most of our carpet designs are woven in white yarn. Subsequently, the carpet is dyed in our own plant, where we can dye the precise amount required for a specific project, whether the order is for 200 or 20,000 square metres.

*The colours shown in this catalogue are representative and may vary from the actual product.*

# STELLAR

– the new star on the floor

A new star in the world of flat-woven carpets has taken shape in our ongoing product development at the loom. Our master weaver has created a unique structure that captures the depth of the cosmos, where stars and other celestial bodies appear on a dark background of infinity and eternity.

STELLAR is the essence of a sustainable, beautiful and hardwearing carpet, made of 100% recycled Econyl® yarn. This flat-woven carpet has a low, dense weave that gives it a soft, pleasant quality.

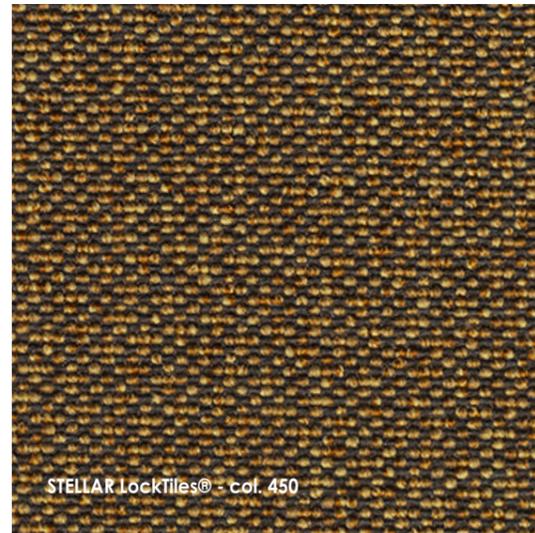

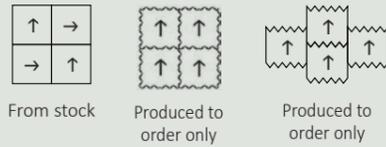

Available as square carpet tiles, ZigZag-Tiles® and LockTiles® – our patented concept that allows for a perfect installation with minimally visible joints and a homogeneous expression. STELLAR LockTiles® won the prestigious iF DESIGN AWARD 2024.

Available in nine well-balanced colours. Custom colours available from +200 m².

For more information on LockTiles® and ZigZag® - see pages 36-39.

STELLAR LockTiles® - col. 750

# NORDIC

– Nordic beauty for all times

Nordic offers a similarly simple design as COM 1000 and is the essence of a timeless carpet with high quality as the key factor. The classic expression sparks associations to cobblestone paving, a classic architectural element in the urban space.

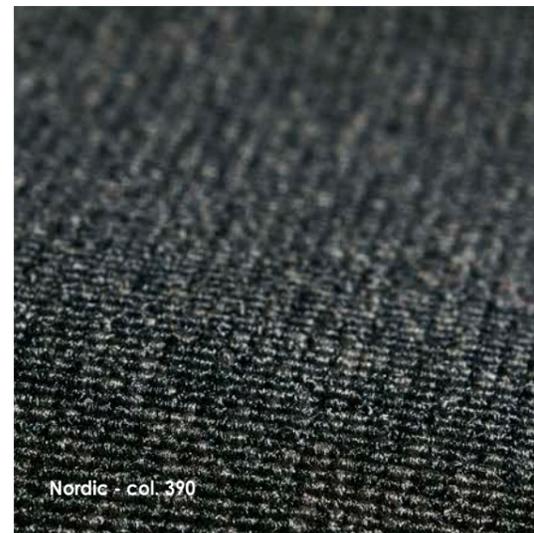

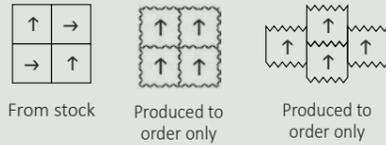

With its Nordic simplicity, based on proud weaving traditions, this carpet is a beautiful choice at all times and for any type of commercial project. Like most Fletco carpets, Nordic is woven of white, undyed yarn and dyed after weaving, which offers a high degree of flexibility for specific commissions, a wider colour range and the possibility of custom colours.

Available as broadloom, square carpet tiles, ZigZag-Tiles® or LockTiles® – our patented concept that allows for a perfect installation with minimally visible joints and a homogeneous expression.

Available from our warehouse in 18 carefully curated colours. Custom colours available from 200+ m<sup>2</sup>. Felt backing from +200 m<sup>2</sup>.

### Recommended installation:

# NORDIC LIVING

– style and comfort in one

Nordic Living brings a refreshing touch to the classic flat-woven bouclé pile. The dense loops with the recurring rounded shapes spark associations to the countless apples that are harvested every year in local Danish orchards and stacked, row after row, in apple crates to find their way into lunch boxes, cakes and dinners as the essence of the Nordic lifestyle and hygge.

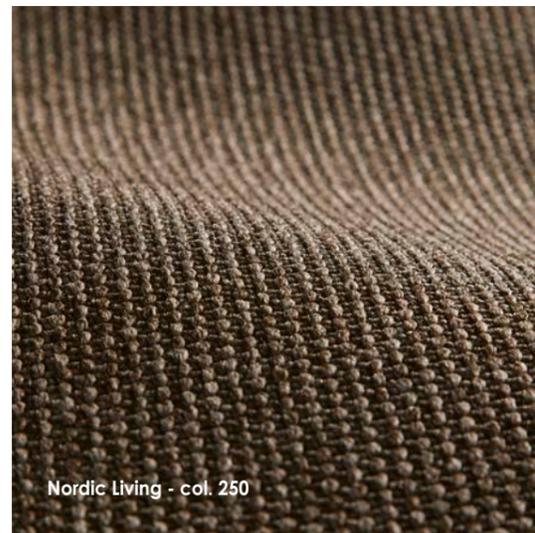

The unique weave gives the hardwearing carpet a vibrant colour play and a lovely Scandinavian expression that makes Nordic Living a beautiful and elegant choice. The carpet is available as broadloom and as square carpet tiles in a beautiful colour scale that includes classic colours as well as livelier notes for bolder interiors.

Available from our warehouse in 17 stunning colours. Custom colours available from 200+ m<sup>2</sup>. Felt backing from +200 m<sup>2</sup>.

# COM 1000

– quality and functionality at all times

With its stringently simple design, COM 1000 is the essence of a timeless carpet with an emphasis on exquisite quality and exceptional functionality. The classic expression sparks associations to cobblestone paving, a classic architectural element in the urban space.

The flat-woven carpet is the obvious first choice in settings with extraordinary cleaning requirements along with high standards for quality and comfort. COM 1000 is woven from dyed-in-the-wool yarn, which ensures that the carpet will stay beautiful in settings that are subject to especially demanding cleaning procedures.

Available as broadloom, square carpet tiles, ZigZag-Tiles® or LockTiles® – our patented concept that allows for a perfect installation with minimally visible joints and a homogeneous expression.

Available from our warehouse in 10 timeless colours. Felt backing from +200 m<sup>2</sup>.

For more information on LockTiles® and ZigZag® - see pages 36-39.

COM 1000 tile - col. 850

# EX-DONO QUARTET

– the rich diversity of life

Ex-Dono Quartet is a contract carpet that combines wearability and good acoustic properties with an expression of natural poetry. The coarse pile is tufted in a staggered pattern full of artistic vigour and details, as if the carpet were a flowery meadow in all its poetic exuberance, with flowers and grasses representing the rich diversity of life.

The organic appearance of the carpet is underscored with muted tone-on-tone colourways. This gives Ex-Dono Quartet a beautiful, mottled expression that adds subtle character to historical architectural interiors as well as new builds. Thanks to the high, tufted pile, the carpet is soft underfoot and noise-dampening. Available as broadloom and as square carpet tiles.

Available in 18 classic colours. Custom colours available from 200+ m<sup>2</sup>. Felt backing from +200 m<sup>2</sup>.

# ZENITH

– soft as the green forest floor

Zenith is soft, like a mossy forest floor, and has exceptional noise-dampening properties. With its tufted cut pile, the carpet brings the deep, quiet calm of the forest inside – the peaceful atmosphere of nature that is so coveted in our modern life.

In addition to its positive contribution to interior acoustics, Zenith creates a calm, cosy atmosphere with its natural warmth and soft expression. The hardwearing carpet is well suited to high-intensity use in architectural and interior projects with a focus on the high quality and durability of the individual design elements. Available as broadloom and as square carpet tiles in a wealth of vibrant colours that create an exclusive expression.

Available in 18 vibrant colours. Custom colours available from 200+ m<sup>2</sup>. Felt backing from +200 m<sup>2</sup>.

# PENTA & PENTA STRIPE

– the budding green revolution

At first glance, with their small, dense loops, Penta and Penta Stripe may look like a traditional bouclé carpet. However, an in-depth look at the design reveals a different story, like the first sprouts in a field, pushing up with exuberant vitality.

Penta and Penta Stripe is a revolutionizing yarn-dyed tufted carpet in four layers. All materials and every single layer are carefully selected with an emphasis on sustainability, total product weight and indoor climate comfort – key elements that help bring this classic design into the future. The dyed-in-the-wool yarn is a top choice when special cleaning criteria apply, as it ensures that the carpet maintains its beautiful appearance over time.

The carpet comes in two timeless versions: Penta, which brings a uniform, understated expression, and Penta Stripe, whose simple and elegant stripes add a little more character without dominating the interior. Both carpets are available both as broadloom and as square carpet tiles in a muted, universally applicable colour scale.

Penta is available in six colours, Penta Stripe in five.

## A SUSTAINABLE FOUNDATION

### TAKING THE LEAD WITH ATTENTION TO DETAIL

We believe firmly that using nature's resources in manufacturing obliges us to be as responsible as possible. This means that top quality is a key priority in every part of our product development and manufacturing processes. To us, sustainability is not an abstract concept but a concrete part of what we do every day.

We take the lead by embracing new production methods and materials with the ambition of going above and beyond the current standards in the carpet industry. And we go into detail to create durable carpets based on versatile, classic designs and uncompromising quality standards to make sure they will stay beautiful for many years to come. To us, this is the essence of sustainability.

We use recycled materials whenever possible: the carpet backing is made of recycled plastic bottles, the carpet tubes are made of recycled plastic, and even the smallest bit of yarn is recycled along with cardboard and other scraps from our production to avoid wasting resources. Since 2016, we have contributed to the green transition in Denmark and bought fully CO<sub>2</sub>-neutral wind power equivalent to our annual energy consumption.

## CERTIFICATIONS AND COMMON SENSE

### WE TAKE RESPONSIBILITY FOR PLANET AND PEOPLE

Regard for the environment is part of our DNA, and as a responsible manufacturer, we produce carpets with many of the general certifications designed to help architects, distributors and consumers around the world choose sustainable products. However, certifications are only part of what makes Fletco's carpets a safe and responsible choice when it comes to looking after both global and indoor climate.

We take responsibility for planet and people by creating quality products with long durability and – across all our certifications – using common sense as our most important guide in navigating the complex concerns in relation to total climate footprint and environmental impact.

## GOLD FOR COMFORT AND INDOOR CLIMATE

### WE CARE ABOUT INDOOR CLIMATE AND AIR QUALITY

Thanks to our innovative production equipment, all our carpets are made without the use of bitumen, latex, PVC, PFAS or other harmful substances that have traditionally been part of carpet production.

We care about indoor climate and air quality, with low emission of air pollutants as a key factor. All our contract carpets carry the Eurofins Indoor Air Comfort Gold label for complying with the strictest requirements for the emission of VOCs (Volatile Organic Compounds). This umbrella certification encompasses the most significant and far-reaching voluntary European environmental certificates, including Cradle to Cradle, the Nordic Swan Ecolabel, Danish Indoor Climate Labelling and, partially, M1. The Eurofins Indoor Air Comfort Gold certificate is thus accepted on a par with voluntary international environmental certifications such as BREEAM and LEED in environmentally sustainable construction.

## BECAUSE WE PROTECT THE ENVIRONMENT

### EPD – THE ENVIRONMENTAL IMPACT OF OUR CARPETS

All our contract carpets have EPDs (Environmental Product Declaration) that document the individual product's environmental impact and thus provide the necessary data for calculating the total environmental impact of an interior or building project. The EPDs are based on international ISO standards and are third-party-verified.

### PEF – OUR COMBINED CLIMATE FOOTPRINT

For years, CO<sub>2</sub> emission has been the dominant focus, but it is just a small component of the many, mostly harmful greenhouse gases that are emitted over a product's lifecycle. CO<sub>2</sub>e – carbon dioxide equivalent – is a measure of the total amount of greenhouse gas emissions over the full lifecycle of a product.

Why PEF? To ensure mutually comparable CO<sub>2</sub>e assessments, the EU has established a new calculation method called PEF (Product Environmental Footprint), which contains predefined measures for all aspects of the PEF. Thus, if any data is missing, worst-case figures will be applied.

Compared with the EPD, the PEF can often contribute twice as many points to building certifications as BREEAM and LEED, because the broader data input makes the calculations more accurate.

We have PEF reports for all our contract qualities. By choosing contract carpets whose CO<sub>2</sub>e impact is based on PEF calculations you will automatically meet the documentation requirements for your company's CSR reporting.

### OUR CONTRIBUTION TO THE GREEN TRANSITION

Wind-generated electricity causes no CO<sub>2</sub> or particle emissions. In order to contribute to the green transition in Denmark, our production facilities are powered by fully CO<sub>2</sub>-neutral Danish wind energy.

In 2020, we installed a geothermal system to reduce our consumption of fossil fuels. Most of the waste heat from our production facility is captured and utilized. For example, we recover and use heat from our tile production and compressors to heat our buildings.

We are continually looking into new possibilities, and when we develop new carpet qualities, we always aim to reduce our CO<sub>2</sub>e emissions without compromising on quality.

100% POWER CONSUMPTION FROM DANISH WIND TURBINES
